

## Installer quelques paquets

```
pkg install perl5  
pkg install wget  
pkg install compat6x-amd64
```

## Monter le CROM des VMware Tools

```
mount -t cd9660 /dev/cd0 /mnt/cd /home/infra/  
tar xvfz /mnt/vmware-freebsd-tools.tar.gz  
sync  
umount /mnt/  
cd vmware-tools-distrib/
```

## Récupérer des patches

```
cd /tmp  
wget http://ogris.de/vmware/vmware-tools-distrib.diff  
wget http://ogris.de/vmware/vmblock-only.diff  
wget http://ogris.de/vmware/vmmemctl-only.diff
```

## Appliquer les patch

```
cd /home/hugues/vmware-tools-distrib  
patch -p 1 < /tmp/vmware-tools-distrib.diff  
vmblock
```

```
cd lib/modules/source/vmblock  
tar xvfz vmblock.tar  
cd vmblock-only/patch -p 1 < /tmp/vmblock-only.diff make make install  
vmmemctl
```

```
tar xvfz vmmemctl.tar  
cd ../vmmemctl-only/patch -p 1 < /tmp/vmmemctl-only.diff make make  
install
```

## Modification du path de perl

Au profit de /usr/local/bin/perl.

```
cd ../../../../..  
vim vmware-install.pl  
vim /usr/local/bin/vmware-config-tools.pl
```

## Installation des VMwareTools

```
./vmware-install.pl
```
